Summary

Results-driven Full Stack MERN Developer with hands-on experience building scalable web applications, optimizing backend systems, and improving performance. Final-year B.Tech student with a strong foundation in React, Node.js, Express, and MongoDB, and a proven track record of delivering production-ready solutions.

Experience

Techpotli (Matoshi Infotech)

Sept 2025 – March 2026

Software Engineer Intern

Remote

- Developed and customized **120+ production-ready templates** across **40+ diverse industry categories**, ensuring high-quality UI/UX and responsive design standards.
- Refined **MERN stack** components and streamlined **Git/GitHub** workflows to facilitate efficient team collaboration and version control.
- Optimized **SEO, metadata, and performance** for client applications, significantly reducing page load times and improving search engine visibility.

Webxela

Feb 2025 – Aug 2025

Software Engineer Intern

Remote

- Deployed and **reverse-engineered** open-source projects to analyze and improve system architecture and workflows.
- Enhanced backend functionality using **Node.js** and managed state-driven frontend updates in **React**.
- Identified and resolved critical bugs, improving overall system stability and application reliability.

Atheera Client

Nov 2024 – Aug 2025

Freelance Full Stack Developer

Remote

- Engineered full-scale **E-commerce platforms** for jewellery and clothing using the **MERN stack**, integrating **Google OAuth** and **Twilio API** for automated notifications.
- Managed the **DevOps lifecycle** by manually deploying applications on a **Hostinger VPS**; configured **Nginx** as a reverse proxy and **PM2** for 24/7 process management.
- Handled complete **Infrastructure & Domain management** via GoDaddy, ensuring seamless DNS propagation and secure production access.

Projects

IntelliView — AI Interview Platform *React, Node.js, Express, MongoDB, GroqAI API*

- Built a full-stack AI-powered interview platform simulating real interview scenarios with real-time feedback.
- Designed backend APIs for interview creation and implemented role-based access control (RBAC).
- Integrated an AI-based scoring pipeline and deployed the end-to-end application.

Axoryn — Multimedia Platform *React, Node.js, Express, MongoDB, Redux Toolkit, Cloudinary*

- Developed a scalable platform supporting video uploads, playlists, and user interactions.
- Optimized data handling using MongoDB aggregation and improved state management with Redux Toolkit.
- Integrated Cloudinary for media storage and handled extensive API testing using Postman.

Technical Skills

Languages: JavaScript, TypeScript, Python, C, C++, SQL

Frontend: React.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, PostgreSQL

Tools & DevOps: Git, GitHub, Docker, Nginx, PM2, Postman, VS Code, VPS (Hostinger, GoDaddy)

Core Concepts: Data Structures & Algorithms, MVC Architecture, Authentication (JWT), API Design, Schema Validation (Zod), ORM (Prisma)

Education

Sunderdeep Engineering College, AKTU University

2022 – 2026

B.Tech CSE (AI/ML)

Ghaziabad, UP

- CGPA: **8.34** (till 7th semester)

Achievements

- Solved 100+ DSA problems** across LeetCode, GFG, and Masterji.io.
- Runner-up – Tech Fusion Innovators Challenge**, IPEM Ghaziabad, 2024.
- Moderator & Organizer – Pears Global Hackathon**, coordinated outreach for 100+ teams.
